

BRAD C. WOHLER

PROJECT GEOLOGIST

PARAGON

PROFESSIONAL EXPERIENCE

Mr. Wohler is a founding member of Paragon Consulting Group. He is a project geologist for the firm. Mr. Wohler is experienced as a field supervisor and/or project manager on a variety of environmental projects involving a variety of contaminants. Mr. Wohler has extensive experience in the project management of UST closures, contaminant assessments, Level I and Level II pre-purchase site assessments and RCRA Closures. He also has managed and/or supervised numerous remediation projects involving the removal, transportation and disposal of hazardous waste. In over 28 years of experience in the environmental field, Mr. Wohler has observed and directed the drilling and installation of over 4,000 monitoring and remedial wells.

Representative projects of Mr. Wohler include being the field supervisor for a community clean-up project involving the assessment of over 130 UST sites. During this assessment over 900 borings were advanced and over 500 wells were installed. As part of that project, Mr. Wohler was responsible for obtaining off-site access for nearly 100 properties. Mr. Wohler was the field supervisor for assessment and remedial design activities for the WDEQ in Riverton, Sundance and Worland in Wyoming. Mr. Wohler also has served in the capacity of Quality Assurance/Quality Control inspector for the U.S.E.P.A., Region VII on a site involving hazardous waste removal, installation of bedrock groundwater monitoring wells, and surface and subsurface sampling. Mr. Wohler has supervised several soil removal clean ups, ranging from former coal-gasification plants to pesticide spills to hazardous waste landfills. Many of these projects were performed in Level B and Level C safety protection.

Mr. Wohler's project management duties include proposal preparation, development of work plans, evaluation of field data and report writing. Mr. Wohler's field supervision duties include development and execution of work plans, documentation of field activities, observation and oversight of subcontractors, and troubleshooting field problems. Mr. Wohler's field supervision responsibilities also include geologic classification, field testing of contaminated soils, monitoring well installation, soil and water sampling, and aquifer testing.

Previously, Mr. Wohler worked for a civil engineering firm in Kansas. There, Mr. Wohler was a field geologist/supervisor for all soil testing and drilling for various geological and geotechnical investigations. He also performed legal, topographic, and construction surveying.

ADDITIONAL COURSES

Methyl Tertiary Butyl Ether Regulation, Training/Outreach Program – Colorado Department of Labor and Employment, Oil and Public Safety, August 2005.

Remediation Economic Feasibility Summary (EFS) and Monitored Natural Attenuation in Groundwater (MNA) Training/Outreach Program – Colorado Department of Labor and Employment, Oil and Public Safety, November 2003.

Risk-Based Corrective Action, Colorado Department of Labor and Employment, Oil Inspection Section Seminar, Denver, Colorado, February 1999.

EDUCATION

Bachelor of Science, Geology, 1986, Kansas State University

AFFILIATIONS

American Association of Petroleum Geologists

Geological Society of America

National Water Well Association

WORK HISTORY

Paragon Consulting Group, Inc., Project Geologist, 1997 - present.

Terracon Environmental, Inc., Project Geologist, 1991 -1997., Staff Geologist 1988-1991.

Miles Engineering & Surveying, Geologist, 1986 - 1988.
